

## Syensqo Paris site receives Trusted Information Security Assessment Exchange (TISAX®) certification

Syensqo R&I site recognized as a safe and trusted partner for the automotive value chain

Brussels, 9 January, 2024 - 9:00 CET/CEST

Syensqo's research and innovation site in Paris (Aubervilliers), France is the first facility in the industry to achieve the TISAX® certification, which guarantees the protection of shared sensitive data. This information security assessment (ISA) certification is required in the EMEA region by the [VDA](#), the German Association of the Automotive Industry.

With more than 400 employees, the Syensqo's R&I center in Paris (Aubervilliers) develops a combination of expertise and capabilities in inorganic, organic, polymer and physical chemistry, with a strong track record of sustainable innovation answering customers needs. In the automotive sector, the site innovates in the field of next generation batteries, additives to stabilize membranes in fuel cells, lubricants for steel cord as well as metal protection and anti corrosion solutions.

Syensqo takes information security, such as data protection and connections with third parties, very seriously and, in achieving this certification, is proud to demonstrate its commitment to the automotive industry.

"Trust is essential in our industry and in our relationship with customers in the research and innovation fields. This TISAX® level 2 certification demonstrates our ongoing commitment to information security and quality," said Florence Turpin, Syensqo R&I Paris Director. "We look forward to continuing to support the automotive industry in meeting challenges in the areas of electrification, improved durability and energy efficiency."

The company's R&I site in Alpharetta, Georgia (USA) will receive the certification in early 2024, and Syensqo expects to add more sites in due course.

Syensqo is committed to delivering sustainable solutions that address the key challenges facing our planet and society. The company's long-term ambition is to be the main innovation partner for its customers. Automotive is one of the key markets in which

Syensqo aims to demonstrate its innovation power, most notably in advancing electrification technologies.

### About Syensqo

Syensqo is a science company developing groundbreaking solutions that enhance the way we live, work, travel and play. With a diverse, global team of more than 13,000 associates in 30 countries, we bring great minds together to push the limits of science and innovation for the benefit of our customers.

Building on 160 years of legacy, our solutions contribute to safer, cleaner, and more sustainable products found in homes, food and consumer goods, planes, cars, batteries, smart devices and health care applications. Our innovation power enables us to deliver on the ambition of a circular economy and explore breakthrough technologies that advance humanity.
