

Syensqo invests in Bioeutectics, a start-up producing green solvents

The investment, made through Syensqo's venture capital fund, will contribute to bring more sustainable products and processes to market

Brussels, January 23, 2024

Syensqo Ventures, the group's venture capital fund, participated in the \$2.1 million financing round for [Bioeutectics](#), alongside [Fen Ventures](#), [Atento Capital](#) and [SOSV \(IndieBio\)](#). Founded in 2019, Bioeutectics provides natural and high-performance solvents that make industrial products and processes more sustainable. This new investment strengthens the [existing partnership](#) between Syensqo Ventures and the [Genesis Consortium](#), supporting startups in the SOSV's IndieBio startup development program, the #1 early stage biotech incubator.

Syensqo, through its [Renewable Materials and Biotechnology](#) growth platform, is driven by a strong commitment to develop more sustainable solutions in the food, agro, industrial and biopharma sectors.

"We see a growing demand for efficient and environmentally friendly solvents, which can also be biodegradable, non-toxic and affordable. Bioeutectics' cutting-edge technology is at the forefront of solvent innovation, combining high-performance, quality and sustainability that could bring real added value to Syensqo's portfolio of products," said Jean-Christophe Castaing, Global R&I Director, New Technologies at Syensqo.

Based on pioneering technology - Natural Deep Eutectic Solvents (NADES), Bioeutectics mimics the way plants elaborate their own solvents, using 100% renewable sources. By replacing petrochemical-based solvents with natural alternatives, Bioeutectics provides solvents with an improved environmental, health, and safety profile that are aligned with and contribute to the achievement of sustainable development goals.

“We are excited to have Syensqo onboard to help us bring these early stage innovations to the market. Syensqo’s expertise in solvents and formulation is key to our success,” said Tomas Silicaro, CEO of Bioeutectics.

“We are thrilled to partner with this enthusiastic team, who is working on the future of green solvents. Bioeutectics has developed not only specific products but also a platform to design these innovative solvents, increasing significantly the potential applications”, said Coppelia Marincovic, Partner at Syensqo Ventures.

About Syensqo

Syensqo is a science company developing groundbreaking solutions that enhance the way we live, work, travel and play. Inspired by the scientific councils which Ernest Solvay initiated in 1911, we bring great minds together to push the limits of science and innovation for the benefit of our customers, with a diverse, global team of more than 13,000 associates in 30 countries.

Our solutions contribute to safer, cleaner, and more sustainable products found in homes, food and consumer goods, planes, cars, batteries, smart devices and healthcare applications. Our innovation power enables us to deliver on the ambition of a circular economy and explore breakthrough technologies that advance humanity.
